

1st Course, 2nd Class

Monday, January 23

1. Welcome our new student Will.
2. You are not required to attend this conference. You are required to attend the 2024 and 2025 conferences. Graduation will be at the 2025 conference.
3. Homework for this week. New videos. 2 paragraphs or 10-minute video.
4. If you have not used a program to capture your screen and voice, please start playing with a program to do this soon. Youtube works very nicely for this. You won't need more than a length of about 20 minutes.
5. Those of you who carefully watched all the videos, submitted the homework and got feedback from me: it works, right? :)
6. Minor note: There will be an improvement to the appearance of our homework page this week, and class notes and the chat will have their own link.
7. Meanings of the planets. First, an additional note about Venus square Mars in Margaret's chart: the natal chart only tells us things not missing in the person's life. We need to look at the tapestry of vibrations that these aspects are embedded in to understand how they function.
