

1st Course, 6th Class
Wednesday, February 20

1. Homework: Similar to the previous weeks.

2. Priority in interpretation:

----- of primary importance: -----

a. Aspect Patterns

b. Midpoint Patterns

----- of secondary importance: -----

c. Isotraps

d. Arabic Parts

e. Zodiac Signs

f. House Placements

BUT zodiac signs and house placements work differently and are VERY IMPORTANT for some purposes.

Note: Arabic Parts are Isotraps!!! (for some reason the Hellenistic and Medieval astrologers are still not fascinated by this).

Aspects, midpoints, isotraps and arabic parts are

vibrational. Zodiac signs and houses are structures in space and they are also created by vibrations!

3. We are always discovering new things. I discovered something new yesterday from Margaret's homework.

Fortune Asc + Moon - Sun

With Sun Mercury Saturn though, it is best to pay attention when communicating with others, try not to be so critical of others, instead, explain what is wrong before making suggestions. She has a good eye but may appear to be critical of others.
